

We are authorised dealers for a large selection of tools and machinery, carefully selected for their high quality, value for money and long working life.

Most of our stock is purchased locally in Cumbria, however, we do acquire timber from around the country to ensure a wide selection. We only source from managed woodland or where trees have to be extracted due to development etc.

Due to high demands for quality hardwoods we have established links with a very well respected EU timber merchant and now import direct to maintain high stock levels. We also hold stocks of exotic timbers from Australia, South Africa, India and South America.

Logs are milled on the premises, followed by air drying in the traditional way. The moisture content is reduced then kiln dried in our state-of-the-art computerised heat vent kiln.

High-grade beams and architectural timbers are cut to order on the premises. We carry large stocks of top quality oak for planking and cut the larger beams leaving the heart of the tree boxed in. Please telephone to discuss requirements.

G&S Specialist Timber

timber, tools and machinery specialists

Next to The Alpaca Centre is G&S Specialist Timber. Hardwood timber merchants, saw millers and importers of exotic woods.

Our new woodturning workshop provide the perfect atmosphere to discuss any aspect of woodcraft. We have a large variety of blanks for woodturners and carvers, including many exotic timbers plus a comprehensive range of tools and machinery. We are committed to providing quality timber, a personal service and woodturning advice to our customers.

We also hold woodworking demonstrations by top international woodturners, Ray Key, Tracy Owen, Mark Baker and Jimmy Clewes. See our website for forthcoming events.
